

Analysis

In compliance with Integrated Pollution Prevention and Control (IPPC), WatStech can offer flow load surveys to help water companies and clients.

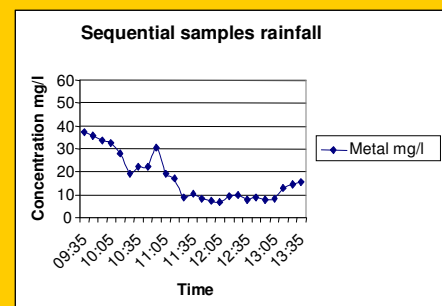

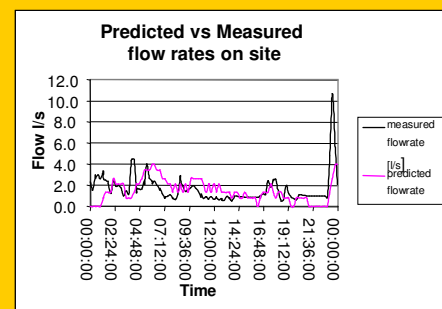

Surveys

Surveys can be tailored to suit any specific requirement but typically include Daily Peak Flow, Daily/hourly flow & load, Rainfall events and Dry Weather Flow (DWF)

Trends

From monitoring rainfall events and site discharge possible future trends can be predicted.

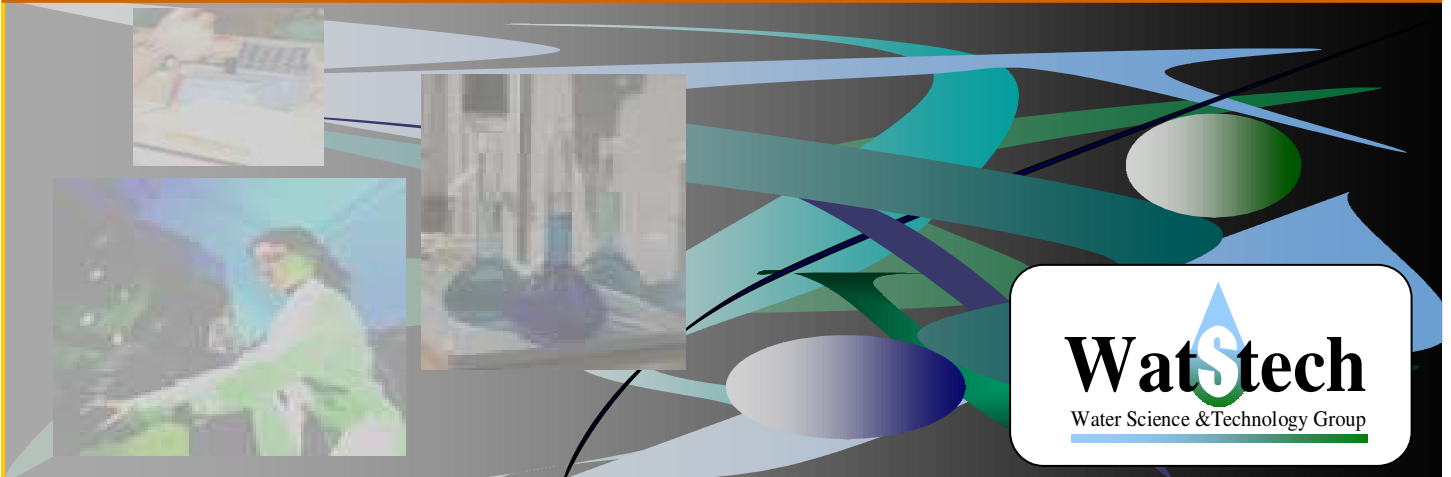

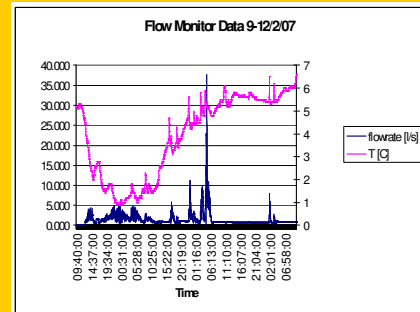

Examples of Flow & Load analysis

MONITORING

- On line monitoring
- Composite or discrete sampling, interval or flow based
- Specifically tailored

Analysis

- Physical** - Total Suspended Solids (TSS), Turbidity, Conductivity etc.
- Chemical** - Nitrate, Phosphate analysis etc.
- Metals analysis** – Iron, Zinc etc.
- Organics** – TOC, COD, BOD, HPC etc.

And many more.....
